

PENTAGON GARMENTS & Group of Companies

Your Trusted Textile Garments Partner

"Quality First, Innovation at Best"

ABOUT US

At Pentagon Group of Companies, our legacy is built on the shoulders of a highly skilled and experienced workforce, fortified by a robust quality management framework. We are dedicated to ensuring efficient production oversight, optimizing resource allocation and offering a diverse selection of premium products to our esteemed clientele.

COMPANY HERITAGE

Founded in 2006 by a coalition of five immensely qualified professionals spanning diverse industries, Pentagon Textile Network is dedicated to delivering superior and cost-effective textile solutions to both domestic and international consumers. Our Managing Director, Mr. Jawahar, whose profound expertise in the intelligent garments ignited the spark for Pentagon's inception, has cultivated strong connections within the textile sector. With his passion for intelligent textiles, we aspire to establish a world-class textile establishment. To fuel our growth, we have embraced a meticulous operational system, incorporating Six Sigma quality, Kaizen Principles, and the 5S methodology. This fosters a culture of continuous enhancement and sustainable advancement. Our Management Council serves as the vanguard in implementing strategies, protocols and policies. In conscientious pursuit of our social obligations, we have strategically located our garment units to invigorate local employment and uplift the communities around Virudhunagar, Tamil Nadu.

VISION

Within five years, we aim to lead the textile sector by integrating segments, pioneering garment designs and innovating to meet evolving market needs.

MISSION

Our mission is to achieve industry leadership through innovative products and services tailored to customer preferences.

INFRASTRUCTURE

At the Pentagon, we understand that infrastructure is the cornerstone of organizational development and goal achievement. We take immense pride in our cutting-edge infrastructure, featuring state-of-the-art technology, machinery and equipment. This advanced setup empowers us to craft a diverse range of products with exceptional efficiency and impeccable precision.

To ensure seamless operations, our infrastructure is strategically divided into specialized units: manufacturing, fabric processing and stitching. Each unit is dedicated to its specific function, enabling us to execute tasks with the utmost precision and effectiveness.

President & CEO

Holly Wise
Chair

With clients relying extensively on our expertise, we take utmost care when it comes to overseeing production at factories. To begin with we work only with factories that are duly certified. We conduct regular factory audits and ensure compliance to government legislations, approvals, certifications, safety codes and worker welfare measures. We maintain a physical presence on the shop floor to effectively ensure adherence to the stipulated norms. Our customer are constantly updated with information on laws and government policies pertaining to safety and labour.

MANUFACTURING PROCESS

Provide insights into our manufacturing process, emphasizing efficiency and sustainability practices if applicable. In our manufacturing process, skilled professionals cut and stitch materials with precision, while stringent quality control ensures flawless products. Expert ironing and careful packaging complete the journey and delivering exceptional garments to our customers.

Cutting

Our skilled professionals precisely cut materials to match design and size requirements, setting the foundation for production.

Stitching

Our expert team crafts the final product by skilfully stitching materials together with attention to detail.

Quality Control

Diligent quality control experts inspect products thoroughly, ensuring no imperfections or deviations from standards.

Ironing

Products undergo professional ironing to eliminate wrinkles and ensure a flawless finish.

Packing

Products are carefully packaged to safeguard them during transportation and storage, guaranteeing pristine delivery to our customers.

CUSTOMIZATION OPTIONS

If we offer customization services, showcase the range of options available to clients, including colors, sizes and personalized branding.

We offer a wide array of customization services, allowing you to design products from our range that precisely align with our needs and preferences.

1. Design: Once the concept is approved, design samples are created to showcase a more refined version of the product. These samples focus on aesthetics and overall appearance.

2. Features: Our products' features and functions can be customised to satisfy your unique needs and market demands.

3. Materials: Functional that Showcase the features and functionalities of the product are called prototypes. Prior to mass production, we are employed to evaluate the product's functionality, spot any problems and ensure the requirements.

4. Sizes: Savour the versatility of personalised sizing choices and guaranteeing an ideal fit for the intended use.

5. Finishes: Personalize the finishes and coatings to add that extra touch of uniqueness and sophistication to your products.

6. Packaging: We give you the creative flexibility to alter our goods to suit your particular requirements, making you stand out from the competition and surpassing your clients' expectations.

7. Production: These are the final samples that are produced during the mass production process. They serve as a reference for quality control and must represent the product that will be delivered to customers.

8. Shipping : In some cases, samples are taken from the bulk production to ensure that the product meets the quality standards during the manufacturing process.

Each type of sample serves a specific purpose in the product development cycle and helps ensure that the final product meets the desired quality and specifications. Properly managing the sample development stages is essential for a successful product launch and customer satisfaction.
